

# HONORS OPTIONS

In addition to the Honors courses offered each semester, there are “Honors Option” courses. Faculty members will occasionally arrange with the Honors Program in advance to create an alternative Honors-level syllabus for a non-Honors course. These courses are designated in the Schedule of Instruction with a descriptor that says “May be taken for Honors credit” or “Honors Option.” (See list below.)

Students interested in taking such courses for Honors credit must inform the instructor of this intention in the first week of class, and immediately submit an application for the Honors Program (if they have not already done so). The instructor will inform the Co-Directors, and will generate an Honors Contract for the student to sign, outlining the additional academic responsibilities and assignments to be fulfilled by the student. A copy of this document should be retained by both the faculty member and the student. A student may “drop” the Honors Option enrollment (while retaining enrollment in the non-Honors course) up to the end of the Add/Drop period.

The faculty member will alert the Honors Co-Directors, who will confirm the student’s good standing in the Honors Program, and then request the special Honors designation from the Registrar; the student will continue to attend and participate with the non-Honors group. When the student successfully completes the assignments for the Honors Option and the course overall, the course will be designated as Honors on the student’s transcript.

**PLEASE NOTE: No more than two (2) of these Honors Options will be counted toward earning the status of “Honors Program Graduate,”** accorded to graduating students who have successfully completed four or more Honors courses. To be an Honors Program Graduate, the student **MUST** take at least two “full” Honors courses; the other two courses may be Honors or Honors Options.
