

# NY HSI STEM Hub

CUNY & SUNY Community College STEM Faculty & Grant Staff,

## Elevate Your Impact:

## Join our Initiative to Build Community College Capacity in Student-Centered Professional Development and Grantsmanship!

This is a dynamic, welcoming year-long program designed to empower faculty and grant staff through student-centered initiatives and grantsmanship. Work collaboratively in a Networked Improvement Community (NIC) to build grant-writing capacity and drive institutional change.

Participating faculty receive stipends.

These workshops equip faculty to integrate student-centered learning into competitive NSF grant proposals through focused professional development and grantsmanship mentoring—building confidence, capacity, and fundable STEM projects.

### Faculty Commitments:

- Engage in ten interactive 1.5-hour professional development workshops
- Complete guided planning and grant proposal development assignments
- Participate in a one-day, in-person Summit with peers and experts
- Develop and submit a competitive NSF proposal by the end of the program year

Funding for this project was awarded by the National Science Foundation #2311235 to the SUNY Westchester Community College, in partnership with the Center for Broadening Participation in STEM at Arizona State University

**APPLY HERE!**

Deadline: May 1, 2026

### What our participants say:

Through networking and collaboration with colleagues, I learned new student-centered teaching techniques and saw what works at other institutions, while the focused proposal feedback and concise grantsmanship guidance gave me clear ideas for strengthening my own proposals.
